TECHNICAL OPERATIONS LEADER & INDUSTRIAL CHEMIST

Results-driven Technical Operations Leader and Industrial Chemist with over 5 years of progressive experience across the paint, beverage, and dairy industries. A unique hybrid professional combining deep expertise in chemical production, formulation development, and quality assurance (QA/QC) with advanced competencies in Software Engineering and Artificial Intelligence (AI). Proven track record of spearheading Kaizen initiatives, optimizing industrial workflows, and leveraging data-driven solutions to improve product throughput, eliminate material waste, and lead high-performing cross-functional teams.

CORE SKILLS:

Sales Strategy & Execution | Quality Assurance | Kaizen Implementation | Dispensing Systems | Technical Customer Engagement | Process Optimization | Paints (Decorative & Automotive) | SOP Development & Compliance | Lab Testing (QC/QA) | Team Collaboration & Leadership | Full stack software engineer | AI expert | AWS support | Sap user | Network troubleshooting | Researcher | chemist | Resin expert | ISO champion | kaizen winner | Just-In-Time (JIT) Scheduling | Material Yield Optimization | Production Planning | Batch Variance Troubleshooting | Solvent-Based Coating Formulation | Product R&D | Language: English, Swahili, Kisii, Kalenjin (Native)

PROFESSIONAL EXPERIENCE:

Production Supervisor- Crown Paints(East Africa) ***Oct 2026 – Present***

-Secures a 99.4% Just-In-Time scheduling accuracy rating by coordinating with procurement to prevent raw chemical stockouts, successfully lowering material holding costs by 11%.
-Delivers a 100% incident-free safety record across volatile environments by enforcing rigid grounding, dust mitigation, and solvent protocols, reducing premium risk penalties by 35%.
-Upskills the floor team to expand cross-functional capabilities by 40%, which reduces unplanned shift absenteeism bottlenecks by 15% via flexible operator rotation.

Technical Chemist (Technical & Operations)– Crown Paints(East Africa) ***July 2025 – Sept 2026***

-Researched and designed innovative paint formulations for industrial and automotive applications, successfully bringing 4 new solvent-based coatings from lab-scale testing to full factory production
-Redesigned existing industrial paint formulas to optimize raw material balances, improving final application viscosity and boosting product performance benchmarks by 12%.
-Adjusted pigment-to-binder (P/B) and solvent ratios in heavy-duty coatings, cutting raw material formulation costs by 6% while maintaining premium coverage standards.
-Partnered directly with QA and QC teams to implement new laboratory testing findings, which dropped final product batch variance and lab-to-factory defects by 15%.

Dispensing Unit – Crown Paints, DAR Road, Nairobi ***Mar 2023 – June 2025***

-Reduced deadstock by 5% through precise shade customization, streamlined tinting operations, and expert color matching to enhance customer satisfaction and minimize excess inventory. Strengthened customer loyalty through detailed product education and tint system mastery.
-Created and implemented standard operating procedures (SOPs), reducing workflow delays by 10% and enhancing team coordination. Led Kaizen initiatives that improved outlet efficiency, process consistency, and increased throughput by 7%

Paint Tinter (Automotive & Decorative) – Crown Paints, DAR Road, Nairobi: ***Sep 2021 – Oct 2022***

-Tinted over 500L of paint per day, increasing daily sales by 2%.
-Reduced factory floor production waste by 20% through the precise implementation of advanced measurement, raw pigment addition, and high-efficiency mixing techniques.

Quality Control Intern – Coca-Cola Beverages Africa: ***Jan 2021 – June 2021***

-Collaborated directly with the main plant production team to execute corrective batch actions, successfully minimizing batch non-conformances by 15%.
-Performed rigorous microbiological and physicochemical tests on finished beverage batches to ensure full compliance with strict quality standards.

Quality Assurance Assistant – Kimogoro Dairy Plant, Narok : ***Jan 2020 – May 2021***

-Enhanced facility-wide quality assurance protocols, driving up raw and processed milk quality metrics by 2% while significantly reducing raw material spoilage.
-Optimized large-scale cooling, pasteurization, and milk flow piping systems to ensure greater operational throughput and manufacturing efficiency.

QC Intern – James Finlay Kenya (Tea Industry): **May 2018 – July 2018**

-Improved standard moisture and texture laboratory testing processes, cutting raw material deterioration and finished spoilage risks by 10%.
-Ensured consistent product leaf profile and weight quality standards in both raw and finished tea products through systematic daily compliance checks.

EDUCATION:

Introduction to AI & LLMS - Cyberiad Labs ***Sept 2026 – Oct 2026***

courses:*M*odel training, and model inference,racking the road your message takes, system prompts, the checks that say no, how AIs think, planning, and deep research, Prompting, including the colleague test, the four ingredients, saying why, the Cyberiad method, zero/one/few-shot methods, thinking, planning, and asking another AI,memory, privacy, sycophancy, wrong and biased outputs, and the great cognitive surrender.

AI for Developers II -ALX ***Sept 2025 – Oct 2025***

courses:*AI feature building, AI-native IDEs, context management, feature enhancement, advanced IDE workflows, automated testing, refactoring, optimization, security review, debugging, documentation.*

Artificial Intelligence(AI Essentials) - ALX ***Feb 2025 – Mar 2025***

Software Engineering-ALX ***Aug 2023 – Oct 2024***

courses*:Programming Fundamentals | Data Structures & Algorithms | Object-Oriented Programming | Web Development | Database Management Systems | Operating Systems | Computer Networks | Software Engineering Principles | Agile & Scrum Methodologies | Mobile App Development | Cloud Computing | Cybersecurity Basics | Machine Learning | Software Testing & QA | Version Control (Git & GitHub)*

BSc. Industrial Chemistry with IT – Maseno University ***Sep 2015 – Dec 2019***

Key Modules:Inorganic & Organic Chemistry | Analytical Chemistry | Physical Chemistry | Polymer Science | Chemical Thermodynamics | Paint Chemistry | Instrumental Methods (AAS, UV-Vis, GC) | Industrial Process Control | Reactor Design | Quality Assurance & Control | Environmental Chemistry | Biochemistry | Chemical Safety & Regulation | Computer Applications in Chemistry | Research Methods in Chemistry

Certifications – Corporate Finance Institute (CFI): **Jul 2022 – Aug 2022**

Financial Accounting | Professional Ethics | Financial Statements | Excel for Professionals
